SUMMARY

Computer Science Engineer with hands-on knowledge across Full Stack Development, Data Science, and Software Engineering, focused on building practical and impactful software solutions. Committed to continuous learning and delivering high-quality software across diverse technical domains.

EDUCATION

Atal Bihari Vajpayee Government Institute of Engineering and Technology Shimla, HP
B.Tech, Computer Science and Engineering — CGPA: 6.5 — Affiliated to HPTU — AICTE Approved Expected May 2026

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: Flask, ReactJS, NodeJS, Pandas, NumPy, Matplotlib, Scikit-learn, XGBoost

Machine Learning: Random Forest, SHAP Explainability, Supervised Learning, Feature Engineering, Model Evaluation

Tools & Databases: Git, GitHub, MySQL, MongoDB, REST APIs, Postman

EXPERIENCE

Technical Intern January 2026 – May 2026
Defence Standardisation Cell, Ministry of Defence, Government of India Bangalore

- Contributed to national technical standards for Armed Forces across 4 domains: AI Decision Support Systems, Hybrid Cloud Computing, Digital Identity Access Management, and Digital Governance.
- Developed an AI-based automated report generation system with a 3-member team, reducing manual documentation effort for defence standardisation processes.

Data Science Intern June 2025 – July 2025
SKYSYS Engineering Mohali, Chandigarh

- Implemented supervised learning, feature engineering, and model evaluation pipelines using Python, Pandas, and Scikit-learn on real-world datasets across a 45-day structured program.
- Designed classification and regression models, earning an Excellent grade across all evaluated modules.

Full Stack Development Intern June 2024 – July 2024
Novem Controls Mohali, Chandigarh

- Built full-stack web applications using HTML, CSS, JavaScript, Python, and Flask with integrated MySQL database connectivity across a 6-week industrial program.
- Delivered a production-ready application covering the complete SDLC: requirement analysis, design, development, and deployment.

PROJECTS

CourtX | *Python, XGBoost, Random Forest, SHAP, Scikit-learn* github.com/Ansal99

- Engineered an AI legal prediction platform using a weighted ensemble of XGBoost and Random Forest supporting 9 case types across 34 Indian states, with SHAP explainability for factor-level reasoning.

CT-FARMA | *Python, Flask, ReactJS, Mistral AI, REST APIs, MongoDB* github.com/Ansal99

- Built a full-stack farmer assistance platform integrating Mistral AI, PlantNet, and OpenWeatherMap APIs with live commodity price tracking, bilingual Hindi/English support, and 15 productivity calculators.

ACHIEVEMENTS

Smart India Hackathon: Selected at institutional level as part of team Cobra Tech to represent college in the national competition organized by Ministry of Education, Government of India.

First Position, Project Exhibition: Secured 1st place among 25 teams at Electronovate Technical Club exhibition, ABVGIET Shimla (February 2025).
